

A COMPREHENSIVE SUMMARY OF

# Clio for Personal Injury *Law Firms*

Don't settle for less—for your clients, or your software.

As a personal injury firm, you're juggling countless moving parts at any given time, from gathering documents to settling cases. Clio's Personal Injury Add-On is built into Clio Manage to simplify legal work, so you can drive cases forward while securing the best outcome for your clients.

It's my dream of what would be in a case management system for medical records.

**JAMES C. SUITS II**

Principal Attorney  
Suits Litigation Inc.

## KEY BENEFITS

### Access every case detail at a glance

Centralize medical records, damages, and settlements alongside your matters.

### Built with your firm's needs in mind

Add Clio's suite of personal injury features by user so you can work the way you want, and only pay for what you need.

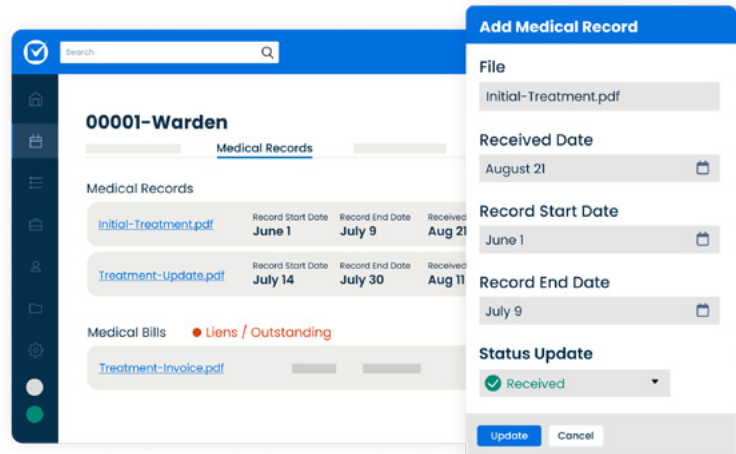

### Protect sensitive client data

Securely store personal health information in compliance with HIPAA regulations.

## KEY FEATURES

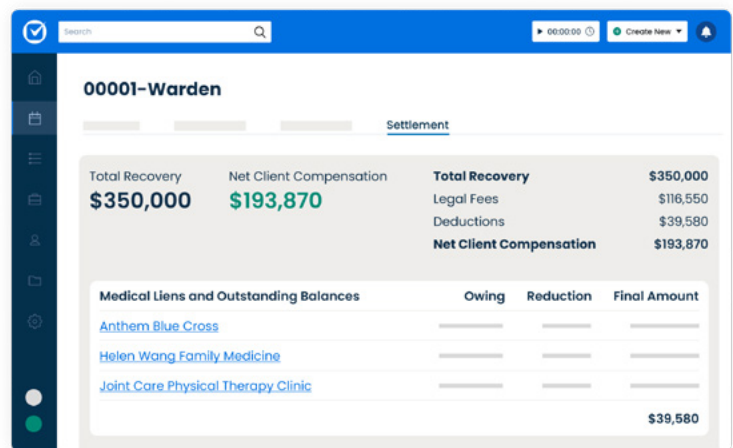

### Manage medical records with ease

Spend time on resolving cases, not tracking down medical records. Organize medical records and bills by provider and keep track of missing information, and when you followed up.

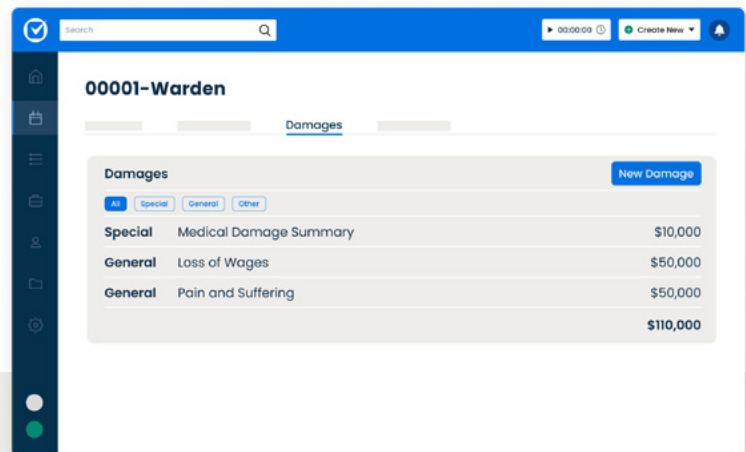

### Maximize your client's settlement

Remove the need for manual calculations. With Clio's settlement calculator, you can make quick and informed decisions during negotiations by running multiple scenarios.

### Pay out settlements faster

Sifting through folders and spreadsheets can cause delays in case resolution. Simplify expense tracking for liens, damages, and fees so you can close cases faster and get your clients paid.
